

Figure 1.) Using TIGER data from the US census bureau and schools data from USGS, this map was produced to show the locations of historical and non historical schools in downtown Athens, GA. A total of 15 schools were identified: 10 non-historical and 5 historical schools. ArcMap methods used in the creation of this map include “Display XY Data”, “Clip”, “Select by Attribute”, and Shapefile creation.

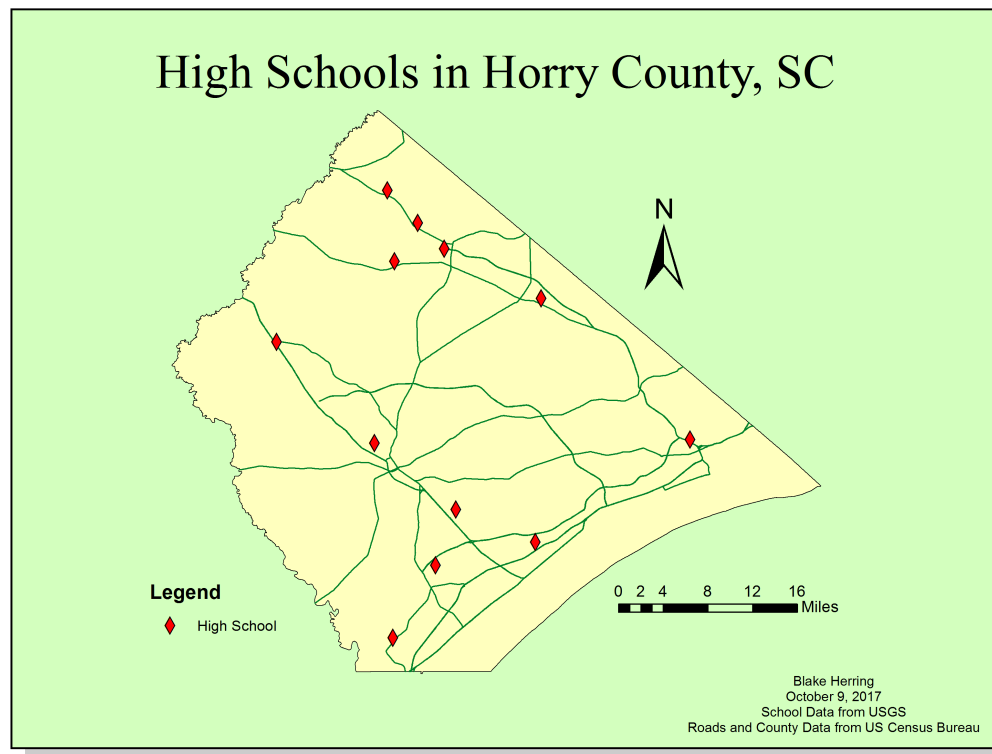

Figure 2.) This map displays the location of public high schools in the author's hometown of Horry County, South Carolina, in the eastern corner of the state. Major roads are displayed in green, and a total of 12 public high schools were included. ArcMap methods used in the creation of this map include "Display XY Data", "Clip", and Shapefile creation.
